---

## PROJECTS

### Super Tic Tac Toe

Mar 2024 - Jul 2024

- Built a 9x9 Tic Tac Toe web game using React.js, with options for offline and online play
- Added online multiplayer using WebSockets, allowing friends to play together over the internet
- Created a user-friendly design with Tailwind CSS, making the game look good on both computers and phones.

### Evently- The Event Manager

Apr 2024 - May 2024

- Built a website using Next.js where people can add events and buy tickets
- Used Next.js to make the site faster and easier to find on search engines
- Created a simple design for users to browse events and buy tickets easily

### E-commerce Website

Apr 2024 - May 2024

- Built a full-stack e-commerce platform with Next.js, featuring user and admin panels.
- Implemented secure authentication and authorization for customer accounts and purchasing.
- Integrated Stripe payment gateway for secure online transactions.
